

CLAIMS

I claim:

1. A garment container comprising:

a plurality of panels, at least one of which has a opening formed therein, said panels being capable of containing at least one garment therebetween;

a pocket installed in the opening and configured to hold a chemical composition in an interior thereof;

means for providing access into the interior of the pocket;

said pocket having a gas-impermeable front surface and a back surface, said back surface being perforated with vents to allow vapor from the chemical composition to pass therethrough to treat the garment.

2. A garment container according to claim 1, wherein:

said back surface of the pocket is gas-impermeable.

3. A garment container according to claim 1, wherein:

said plurality of panels form a rectangular hanging bag for a single garment.

4. A garment container according to claim 1, wherein:

said plurality of panels form a square-topped hanging bag for multiple garments.

5. A garment container according to claim 1, wherein:
said plurality of panels form a clothes trunk.
6. A garment container according to claim 1, wherein:
said plurality of panels form an underbed storage box.
7. A garment container according to claim 1, wherein:
said plurality of panels form a portable closet.
8. A garment container according to claim 1, wherein:
said access means is arranged midway between side edges of the pocket.
9. A garment container according to claim 1, wherein:
said access means is arranged along one side edge of the pocket.
10. A garment container according to claim 1, wherein:
one side edge of the pocket coincides with one side edge of one of the plurality of panels.
11. A garment container according to claim 1, wherein:
two side edges of the pocket coincide with two side edges of one of the plurality of panels.

12. A garment container according to claim 1, wherein:
said pocket extends completely across one of the plurality of panels.
13. A garment container according to claim 1, wherein:
each of said plurality of panels is gas-impermeable.
14. A garment container according to claim 1, wherein:
said pocket is aligned in a same direction as the garment.
15. A garment container according to claim 1, wherein:
said pocket is aligned in a direction perpendicular to the garment.
16. A garment container according to claim 1, wherein:
said plurality of panels is two.
17. A garment container according to claim 1, wherein:
said plurality of panels is six.
18. A garment container according to claim 1, wherein:
said pocket is installed in the opening by stitches.

19. A garment container according to claim 1, wherein:
said access means is a zipper.
20. A garment container according to claim 1, further comprising:
a handle attached to one of the plurality of panels.
